

Product Description: Duracoat Acrylic Sealer is based on acrylic emulsion which gives outstanding sealing properties. It is also designed to give a protective transparent coating on monumental stone, coral stone or cement-based stone whose natural appearance is desired. Not suitable for floors or high friction areas.

Finish: Matt

Application: By Brush, roller, spray

Thinning: Supplied ready for use

Drying Time: Surface Dry: 10 minutes.
Re-coating time; 1 hour

Cleaning: Clean all equipment immediately with water

Colour Range: Whitish, but dries to a clear matt finish

Spread Rate: 14-16 sq. mts. per litre when properly applied on smooth surfaces. Spreading rate will vary on rough surfaces and degree of porosity

Pack Sizes: 1 litre, 4 litres, 20 litres

SPECIFICATIONS:

On exceptionally porous surface apply one coat of DuraCoat Acrylic Sealer. Make sure the surface is dust free before application. Allow overnight drying before applying a second coat of the same.

DuraCoat Acrylic Sealer may be over coated with water based acrylics such as DuraCoat Emulsions.
